Election/Restriction

1. Restriction to one of the following inventions is required under 35 USC 121:
 - I. Claims 1-13 and 21-25, drawn to packets distribution, classified in class 370, subclass 396.
 - II. Claims 14-20, drawn to a printer appliance, classified in class 358, subclass 1.14.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and they have different effects.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I and II is not required for other Group, restriction for examination purposes as indicated is proper.
